Neil Holmes met with the Commissioners and discussed the back slope on the public health nurse building. It is a problem with water and will continue to be that way until the street and curbs are installed. Mr. Holmes said they could install a berm, but it wouldn't be permanent. He suggested placing rip rap on the slope. He will also place 1" rock alongside the valley pan to keep it from draining into the adjoining landowner's property.

Commissioner Griffith discussed the weeds at the building. She would like to see them all removed, even if heavy duty landscaping is installed. Mr. Holmes said he would put down a bentonite plastic and place the rip rap over it. That should eliminate the weed problem and make it look much nicer. He also thought the generator would be installed this week.

Commissioner Griffith moved to approve the landscaping for the public health building and the installation of rip rap. Vice-Chairman Midkiff seconded, and the motion carried.
